HOLESA

Community Safety South Africa · Media & Partner Kit

What HOLESA is

A free community-safety platform for all 9 provinces. Residents report potholes, scams, incidents and community problems. Every report is reviewed by a person and clearly labelled, and community reports are always kept separate from official statistics. The app is in development; founding members are registering now.

Why it matters

Safety information in South Africa is scattered across WhatsApp groups, social media and word of mouth. HOLESA brings it together in one clear, honest place, free for the public. The more people join, the clearer the picture for every community.

Who it reaches

Residents, neighbourhood watches, CPFs, farmers, commuters and local businesses nationwide. Audience and growth figures will be added here as they become available.

Ways to get involved

Free Local Hub listing	Local businesses are listed free, with no contract.
Community Sponsor	Support HOLESA in one town, with recognition on the local page.
Province Partner	Support a whole province, with recognition across that province.
National Partner	Joint campaigns and safety content across South Africa.

Our commitments

Sponsors never influence, edit or remove reports. Public access always stays free. We follow POPIA: no ID numbers, consent first, and personal information is never sold.
